

# North–South Corridor

## River Torrens to Darlington - Ground Investigation Works

As part of the North-South Corridor Project, River Torrens to Darlington, the Department for Infrastructure and Transport advises that ground investigation activities will be undertaken in your area in coming weeks.

This testing will help us develop a comprehensive picture of the underlying soil and groundwater conditions along the South Road corridor (refer to the fact sheet for more information).

### Location and timing:

We will be carrying out geotechnical and hydrogeological investigations on York Avenue at Clovelly Park.

Works will commence on Wednesday, 12 October for approximately eight days between 6am and 6pm (no works will occur on Saturdays or Sundays).

York Avenue will be closed at the corner of English Avenue (during the above hours only), however access to residences will be maintained at all times.

The map on the right shows the location of the test site.

These works may be rescheduled in the event of inclement weather or other circumstances outside our control.

### What to expect:

Temporary traffic restrictions will apply in the vicinity of the works. Signage will be in place to alert road users to the changes in traffic conditions, and road users are advised to take care when travelling through the area.

During the works you may notice an increased presence of machinery as well as ground personnel. Some noise disturbance can be expected at times, caused by the equipment and vehicles used.

Works will be managed to minimise disruption to all road users, businesses and the local community, as much as practically possible.

Thank you for your patience while we undertake these important activities.
